|----------------------------|---|
| <b>Prerequisites</b>       | None  |
| <b>Class Time</b>          | TBA   |
| <b>Location</b>            | TBA   |
| <b>Course Credit Hours</b> | 3:0   |
| <b>Text Book</b>           | Elementary Linear Algebra By Howard Anton ( 9th Edition)          |
| <b>Reference Book</b>      | Introduction to Linear Algebra By Gilbert Strang (Third Edition ) |

### Marks Distribution:

|             |     |
|-------------|-----|
| Attendance  | 10% |
| Assignments | 10% |
| Quizzes     | 20% |
| Mid-Term    | 20% |
| Final Exam  | 40% |

## Grading Policy:

| Numerical Scores | Letter Grade | Grade Points |
|------------------|--------------|--------------|
| 93 & above       | A            | 4.0          |
| 90 - 92          | A-           | 3.7          |
| 87 - 89          | B+           | 3.3          |
| 83 - 86          | B            | 3.0          |
| 80 - 82          | B-           | 2.7          |
| 77 - 79          | C+           | 2.3          |
| 73- 76           | C            | 2.0          |
| 70 - 72          | C-           | 1.7          |
| 67 - 69          | D+           | 1.3          |
| 60 - 66          | D            | 1.0          |

## Course Short Description

This is an introductory course in linear algebra. The course will introduce the basic concepts and techniques of linear algebra, along with the insights of its wide applications in physics, economics and social sciences, natural sciences, and engineering. The course will require the development of theoretical results, which will require the use of mathematical rigor, algebraic manipulation, and geometry.

This course covers, but is not limited to, the study of systems of linear equations, matrices, determinants, vectors and vector spaces, basis and dimension of vector spaces, linear transformations, eigenvalues and eigenvectors, and their applications. Computer software will be used to enhance the learning of the topics and techniques covered.

## Course Objectives

1. To understand the fundamental properties of matrices including determinants, inverse matrices, matrix factorizations, eigenvalues, eigenvectors along with their application, and linear transformations.
2. Understanding the basic concepts of the system of linear equations, apply the matrix calculus to solve linear systems of equations.
3. To comprehend the Euclidean n-space, vector spaces, subspaces, linear span, and determine the basis and dimension of vector spaces.
4. Solving problems using computer programming and graphing calculators to gain an insight into the applicability of linear algebra.

## Course Learning Outcomes

Upon successful completion of this course, students will be able to:

- **(CO-1)** Demonstrate the ability to understand the basic properties of matrices including determinants, inverse matrices, matrix factorizations, eigenvalues, eigenvectors, and linear transformations, the applications of eigenvectors including the investigation of the diagonalizability of matrices.
- **(CO-2)** **Explain** the fundamental concepts of the system of linear equations using geometry and graphs; **and** apply the matrix calculus to solve linear systems of equations.

- **(CO-3)** Comprehend the concept of Euclidean n-space, vector spaces, subspaces, linear span, and determine the basis and dimension of vector spaces.
- **(CO-4)** Develop problem solving ability using computer programming and graphing calculators and have an appreciation of the wide application of this discipline within the scientific field.

| CLOs | Course Outcomes (CO)  | Bloom's taxonomy domain/level<br>(C: Cognitive<br>P: Psychomotor<br>A:Affective) | Delivery methods and activities  | Assessment tools                                |
|------|---|--|----------------------------------|---|
| CO-1 | Demonstrate the ability to understand the basic properties of matrices including determinants, inverse matrices, matrix factorizations, eigenvalues, eigenvectors, and linear transformations, the applications of eigenvectors including the investigation of the diagonalizability of matrices. | <b>C1, C2, C3, C4</b>  | Lectures, notes                  | Quiz, Assignment, Midterms, Final Exam          |
| CO-2 | <b>Explain</b> the fundamental concepts of the system of linear equations using geometry and graphs; <b>and</b> apply the matrix calculus to solve linear systems of equations.   | <b>C2, C3, P2</b>  | Lecture, notes, group discussion | Assignment, Class participation, Quiz, Midterms |
| CO-3 | Comprehend the concept of Euclidean n-space, vector spaces, subspaces, linear span, and determine the basis and dimension of vector spaces.   | <b>C1, C2, C3</b>  | Lecture, notes                   | Discussion, Quiz, Midterms, Final Exam          |
| CO-4 | <b>Develop problem solving ability</b> using computer programming and graphing calculators and have an appreciation of the wide application of this discipline within the scientific field.   | <b>C2, C3, C6, P3</b>  | Lecture, notes, group discussion | Assignment, Discussion, Class participation     |

## Mapping of Course Outcomes

### Class Schedule

| Lecture | Topics   | Article no. in the text book | Assessment tools       | Learning Outcomes |
|---------|--|------------------------------|------------------------|-------------------|
| 1       | Matrices and Matrix Operations, Inverse; Rules of Matrix Arithmetic,             | 1.3, 1.4, 1.7                | Quiz1, Discussions     | CO-1              |
| 2       | Diagonal, Triangular and Symmetric Matrices, Matrices and Matrix Operations,     | 1.3, 1.4,                    | Quiz 1, Discussions    | CO-1              |
| 3       | Inverse; Rules of Matrix Arithmetic, Diagonal, Triangular and Symmetric Matrices | 1.7                          | Assignment I, Midterm  | CO-1              |
| 4       | Elementary Matrices and a Method for Finding inverse of Matrix                   | 1.5                          | Assignment I, Midterm  | CO-1              |
| 5       | Elementary Matrices and a Method for Finding inverse of Matrix                   | 1.5                          | Discussions Midterm    | CO-1              |
| 6       | Determinant by Cofactor Expansion  | 2.1                          | Quiz 1, Midterm        | CO-1              |
| 7       | Evaluating Determinants by Row Reduction   | 2.2                          | Midterm                | CO-1              |
| 8       | Properties of Determinant Function   | 2.3                          | Midterm, Assignment I  | CO-1              |
| 9       | Introduction to System of Linear Equations, Gaussian Eliminations                | 1.1, 1.2                     | Discussions, Quiz 2    | CO-2              |
| 10      | Gaussian Eliminations (No solution and Unique solution)                          | 1.2                          | Midterm, Assignment II | CO-2              |
| 11      | Gaussian Eliminations (many solutions)   | 1.2                          | Midterm, Assignment II | CO-2              |
| 12      | Solution of Homogeneous system of Linear Equations                               | 1.2                          | Midterm, Assignment II | CO-2              |
| 13      | Further Results on Systems of Equations and Invertibility,                       | 1.6                          | Discussions Midterm    | CO-2, CO-3        |
| 14      | <b>Midterm</b>   |                              |                        |                   |
| 15      | Euclidean n-space and properties   | 4.1                          | Discussions            |                   |
| 16      | Euclidean n-space and Gramsmith Orthogonalization                                | 4.1                          | Discussions Final      | CO-2, CO-3        |
| 17      | Linear Transformation  | 4.2                          | Final, Assignment II   | CO-1              |
| 18      | Linear Transformation and properties   | 4.2 , 4.3                    | Final, Assignment II   | CO-1              |
| 19      | General Linear Transformations, Kernel and Range,                                | 8.1, 8.2,                    | Final, Assignment II   | CO-2, CO-3        |
| 20      | Inverse Linear Transformations, Matrices of General Linear Transformations       | 8.3, 8.4                     | Final, Assignment II   | CO-2, CO-3        |
| 21      | Real Vector Spaces   | 5.1                          | Quiz 3                 | CO-1              |
| 22      | Subspaces  | 5.2                          | Final                  | CO-3              |
| 23      | Linear Independence and Dependence   | 5.3                          | Final                  | CO-3              |
| 24      | Basis, Dimension, Solution Space and Null Space                                  | 5.4                          | Quiz 3, Final Exam     | CO-3              |
| 25      | Fundamental Subspace of Linear Algebra (Row Space, Column Space and Null Space)  | 5.5                          | Quiz 3, Final Exam     | CO-3              |
| 26      | Fundamental Subspace of Linear Algebra (Row Space, Column Space and Null Space)  | 5.5                          | Quiz 3, Final Exam     | CO-3              |

|  |  |   |   |      |
|--|--|---|---|------|
| 27   | Rank and Nullity                                   | 5.6   | Final Exam                                  | CO-3 |
| 28   | Eigenvalues and Eigenvectors                       | 7.1   | Quiz 4                                      | CO-3 |
| 29   | Diagonalization                                    | 7.2   | Final Exam                                  | CO-3 |
| 30   | Algebraic and Geometric Multiplicity               | 7.2   | Final exam,<br>Assignment<br>III            | CO-3 |
| 31   | Cheley Hamilton Theorem (CHT) and its applications | 7.3   | Final exam,<br>Assignment<br>III            | CO-3 |
| 32   | Applications of Linear Algebra                     | 11.2, 11.3  | Discussions,<br>Assignment Iv<br>Final exam | CO-4 |
| 33   | Applications of Linear Algebra                     | 11.6  | Discussions,<br>Assignment Iv<br>Final exam | CO-4 |
| 34   | Applications of Linear Algebra                     | 11.7  | Discussions,<br>Assignment Iv<br>Final exam | CO-4 |
| 35   | Applications of Linear Algebra                     | Date<br>Science or<br>Machine<br>learning or<br>any other<br>Discipline | Quiz 5                                      | CO-4 |
| 36   | Applications of Linear Algebra                     | Date<br>Science or<br>Machine<br>learning or<br>any other<br>Discipline | Quiz 5                                      | CO-4 |
| <b>Final Exam (Declared by the Controller of Examinations)</b> |  |   |   |      |

**Note:** The instructor reserves the right to make changes to the syllabus if necessary.

#### List of additional readings

- **Chapter 3: Vectors in 2-Space and 3-Space:** Introduction to Vectors, Norm of a Vector; Vector Arithmetic, Dot Product; Projections, Lines and Planes in 3-Space
- **Chapter 6: Inner Product Spaces:** Inner Products, Angle and Orthogonality in Inner Products, Orthonormal Bases; Gram-Schmidt Process, Orthogonal Matrices; Change of Basis.

#### Classroom Rules of Conduct

Please Refer to NSU Student Handbook, Sections: “Disciplinary Actions” and “Procedures and Guidelines”.

### **Exams & Make-up Exam Policy**

NO makeup for quizzes and NO Formative assessment will be retaken under any circumstances. If a student misses the Midterm and/or Final exams due to circumstances beyond their control (official valid documents are required) and is informed beforehand (if possible), reasonable arrangement may be considered. Please note that the retake exam questions are generally a bit tricky and critical compare to the regular exam questions. **Students may get the opportunity to see/recheck their midterm and Final exam scripts. Cell phones are prohibited in exam sessions.**

**Attendance Policy:** As per NSU policy.
