

North South University
Department of Mathematics and Physics

MAT350: Engineering Mathematics

Course Name: Engineering Mathematics

Course Code: MAT 350

Credit Hours : 3 Credits

Pre-requisite : MAT 130

Term : Spring 2023

Instructor : _____
Office : _____
Email: _____
Office Time : _____

Course Short Description: This course is intended for Engineering students who require a working knowledge of differential equations; included are techniques and applications of ordinary differential equations in engineering problems with some elements of scientific computing.

Course Objectives

1. To classify the different types of differential equations and find the appropriate analytical tools and techniques for finding the solutions of the first order and the second order ordinary differential equations.
2. To create and analyze mathematical models using the first order and the second order ordinary differential equations.
3. To demonstrate students' understanding of how physical phenomena are modeled by system of differential equations and investigate the solution methods.
4. To develop the ability to apply Fourier series and Fourier Integrals to significant applied problems.

Course Learning Outcomes: Upon successful completion of this course, students will be able to:

- (CO-1) Classify the type of a given differential equation and find the appropriate analytical techniques for finding the solutions of the first order and the second order ordinary differential equations.
- (CO-2) Formulate and analyze mathematical models using the first order and the second order ordinary differential equations.
- (CO-3) Solve linear differential equations using different tools, like the Laplace transform technique, power series method; and identify their applications.
- (CO-4) Demonstrate their understanding of how physical phenomena are modeled by system of differential equations and investigate the solution methods.
- (CO-5) Develop the ability to apply Fourier series and Fourier Integrals to significant applied problems.

Course Contents:

1. First Order Ordinary Differential Equations:

Introduction to Ordinary Differential Equations (ODEs), mathematical modeling with ODEs, Separable and Exact ODE, Linear ODE, Bernoulli equation.

2. Second-Order Linear ODEs:

Homogeneous Linear ODEs of Second Order, Homogeneous Linear ODEs with Constant Coefficients, Euler–Cauchy Equations, Existence and Uniqueness of Solutions. Wronskian, Non-homogeneous ODEs, Modeling: Mass–Spring System, Electric Circuits, Resonance, Solution by Variation of Parameters.

3. Systems of ODE:

System of ODEs, Phase plane method, Nonhomogeneous Linear Systems of ODEs.

4. Series Solutions of ODEs:

Power series method, Extended Power Series Method, Bessel’s Equation. Bessel Functions and general solution.

5. Laplace Transformation

Laplace Transformation and its inverse, linearity and shifting, Laplace transformations of derivatives and integrals, Initial Value Problems, unit step function, delta function and t-shifting.

6. Fourier Series and Fourier Functions

Periodic function and Fourier Series, Fourier coefficients and applications. Even and odd functions, Half range expression, Fourier integrals and transforms.

Mapping of Course Outcomes

#	Course Outcomes (CO)	Bloom’s taxonomy domain/level (C: Cognitive P: Psychomotor A: Affective)	Delivery methods and activities	Assessment tools
CO-1	Classify the type of a given differential equation and find the appropriate analytical techniques for finding the solutions of the first order and the second order ordinary differential equations.	C2	Lecture, Video Discussion	Quiz, Assignment
CO-2	Apply and analyze mathematical models using the first order and the second order ordinary differential equations.	C3, C4, P2	Lecture, in-class group discussion, Videos	In class assessment, Midterm exam, Assignment
CO-3	Solve linear differential equations using different tools, like the Laplace transform technique, power series method; and identify their applications.	C2, C3, P2	Lecture, Discussion	Class work, Quiz, Assignment, Midterm Exam, Final Exam
CO-4	Demonstrate their understanding of how physical phenomena are modeled by system of differential equations and investigate the solution methods.	C4, P2	Lecture, Video, Discussion	Demonstration, Quiz, Assignment, Final Exam
CO-5	Develop the ability to apply Fourier series and Fourier Integrals to significant applied problems.	C2, C3, P2	Lecture Video Demonstration	Assignment, Final Exam

Note: C2, C3, C4, and P2 indicate different subdomains of Bloom’s Taxonomy. Please visit departmental website for details.

Marks Distribution:

Attendance	10%
Regular Quizzes	20% (Minimum 05 (five) quizzes & best 03(three) quizzes will count for marks and 1/3 rd syllabus must be covered for taking midterm).
Mid-term	20% (Duration of mid-term exam will be minimum 50 minutes).
Final Exam	40% (Duration of final exam will be minimum 01 hour & 30 minutes).
Assignment	10% (Minimum 04 assignments)
Total Marks	100%

Grading

Policies: As per NSU Grading Policy

Important

Dates: Midterm exam TBA
Final Exam According to NSU Schedule.

Special Instructions:

- Submit the assignments in recommended date. **No late submission will be accepted.** Make a photocopy of your assignment before submission.
- Exam and Makeup policy is given in the last page of this course outline
- A late present means you come to the class within 15 minutes the class starts. You are automatically **absent after 15 minutes delay** and not allowed to the class room.
- If you are a **probation student/retake student**, I would like to have you in 36 classes (presents in minimum **30 classes are must**)

Lesson Plan:

Lesson	Topics	Learning Activities	Assessment tools	Learning Outcome
I	First Order Ordinary Differential Equations: Introduction to Ordinary Differential Equations (ODEs), mathematical modeling with ODEs,	Lecture	Discussions	CO-1
II	First Order ODEs- Separable ODEs Separable ODEs with modeling and applications.	Individual Assignment	Quiz 1 Mid term	CO-1
III	First Order ODEs- Exact ODEs Separable and Exact ODEs with modeling and applications.	Lecture, Group Discussion	Discussions Quiz 1 Mid term Assignment 1	CO-1
IV	First Order ODEs- Exact ODEs Exact ODEs and solution technique	Lecture, Assignment	Quiz 1 Mid term Assignment 1	CO-1
V	First Order Linear ODE: Linear ODE with modeling and applications.	Lecture, Discussion,	Quiz 1 Mid term Assignment 1	CO-1
VI	First Order Linear ODE: Linear ODE with modeling and applications.	Lecture, Discussion,	Quiz 1 Mid term	CO-1
VII	First Order Non-Linear ODE: Bernoulli's equation and applications.	Lecture, Discussion,	Mid term Assignment 1	CO-1

VIII	Second-Order Linear ODEs: Homogeneous Homogeneous Linear ODEs of Second Order: Intro, Types and Solution methods.	Lecture	Mid term	CO-1
IX	Second-Order Linear ODEs: Homogeneous Homogeneous Linear ODEs of Second order and Solution methods.	Lecture	Mid term	CO-1
X	Second-Order Linear ODEs: Non-Homogeneous Non-Homogeneous Linear ODEs with Constant Coefficients: Superposition principle and inverse operator method.	Lecture	Quiz 2 Mid term Assignment 2	CO-1
XI	Second-Order Linear ODEs: Non-Homogeneous Non-Homogeneous Linear ODEs with Constant Coefficients: inverse operator method.	Lecture Assignment	Quiz 2 Mid term Assignment 2	CO-1
XII	Second-Order Linear ODEs: Non-Homogeneous Non-Homogeneous Linear ODEs with Constant Coefficients: Shift exponents method	Lecture	Quiz 2 Mid term	CO-1
XIII	Second-Order Linear ODEs: Non-Homogeneous Non-Homogeneous Linear ODEs with Constant Coefficients: variation of parameters method	Lecture	Mid term Assignment 2	CO-1
XIV	Second-Order Linear ODEs: Non-Homogeneous Problem Practice and preparation of midterm exam	Lecture	Mid term	CO-1
XV	MIDTERM			
XVI	Second-Order Linear ODEs: Modelling Modelling of Mass-Spring System without damper	Discussion Lecture Assignment Videos,	Quiz 3 Final Exam	CO-2
XVII	Second-Order Linear ODEs: Modelling Modelling: Mass-Spring System without damper	Lecture, Videos,	Quiz 3 Final Exam Assignment	CO-2
XVIII	Second-Order Linear ODEs: Modelling Modelling: Mass-Spring System with damper	Lecture	Quiz 3 Final Exam Assignment 3	CO-2
XIX	Non-homogeneous ODEs: Cauchy Euler Equation and Variation of parameters	Lecture,	Assignment 3 Final Exam	CO-1
XX	Systems of ODEs System of ODEs: Homogeneous system	Lecture, assignment	Final Exam	CO-4
XXI	Systems of ODEs System of ODEs: Homogeneous system, different types of solutions with initial conditions	Lecture, assignment	Assignment 3 Final Exam	CO-4
XXII	Systems of ODEs Nonhomogeneous Linear Systems of ODEs.	Lecture, assignment	Assignment 3 Final Exam	CO-4
XXIII	Systems of ODEs Nonhomogeneous Linear Systems of ODEs.	Lecture, assignment	Formative- Assessment, Final Exam	CO-4
XXIV	Laplace Transformation Laplace Transformation: Intro, derivations of L.T of functions	Lecture, assignment	Quiz 4 Final Exam	CO-3
XXV	Laplace Transformation Laplace Transformation: Inverse L.T, derivatives of L.T of functions, Application to solve ODEs	Lecture, assignment	Assessment 4 Quiz 4 Final Exam	CO-3
XVI	Laplace Transformation linearity and s-shifting of L.V and solutions of ODEs	Lecture,	Assignment 4 Quiz 4 Final Exam	CO-3

XXVII	Laplace Transformation Initial Value Problems, unit step function, delta function and t-shifting.	Lecture, class discussion, Problem solving	Assignment 4 Quiz 4	CO-3 CO-2
XXVIII	Fourier Series and Fourier Functions Periodic function and Fourier Series, Fourier coefficients and applications.	Lecture, class discussion, Problem solving	Final Exam Assignment 4	CO-5
XXIX	Fourier Series and Fourier Functions Fourier series of arbitrary period, Fourier Even and odd functions, problem solutions	Lecture, class discussion, Problem solving	Final Exam	CO-5
XXX	Fourier Series and Fourier Functions Half range expression, problem solutions	Lecture, class discussion, Problem solving	Final Exam Assignment 4	CO-5
XXXI	Fourier Series and Fourier Functions Fourier integrals and transforms	Lecture, class discussion, Problem solving	Final Exam	CO-5
XXXII	Fourier Series and Fourier Functions Fourier integrals and transforms	Lecture, class discussion, Problem solving	Final Exam	CO-5
XXXIII	Series Solutions of ODEs Power series method-Intro, solution about ordinary point (1 st order ODEs)	Lecture, class discussion, Problem solving	Quiz 5 Final exam	CO-3
XXXIV	Series Solutions of ODEs Power series method- solution about ordinary points (2 nd order ODEs)	Lecture, Assignment	Quiz 5 Final exam	CO-3
XXXV	Series Solutions of ODEs Power series method-about singular point	Lecture, In class discussion, Problem solving	Final exam	CO-3
XXXVI	Preparation for final Exam: Review of selected topics	Explaining, Demonstrating		
Final Exam				

Classroom Rules of Conduct: Please Refer to NSU Student Handbook, Sections: “Disciplinary Actions” and “Procedures and Guidelines”.

Exams & Make Up Policy

Minimum five quizzes will be taken (best three will be considered). NO makeup for quizzes and NO Formative assessment will be retaken under any circumstances. If a student misses the Midterm exam and/or Final exam due to the circumstances beyond their control (official valid documents are required) and informed beforehand (if possible), reasonable arrangement may be considered. Please note the retake exam questions are generally a bit tricky and critical compare to the regular exam questions. **Students will get the opportunity to see/recheck their midterm and Final exam scripts.**
